→ Bring advantages to the road and the office

Shaw Tracking understands the risks associated with relying upon cumbersome and potentially inaccurate manual log systems, including costs related to compliance breaches, reduced productivity and operational inefficiency. Qualcomm has streamlined record keeping through Hours of Service (HOS): an electronic on-board recording (EOBR) system that automatically creates driver

Driver availability

logs that are fully compliant with the latest rules and regulations of the MTO and the Federal Motor Carrier Safety Administration (FMCSA).

Manage Your Fleet More Efficiently

HOS provides near real-time monitoring of drivers' hours, allowing dispatchers to access current information about driver availability and reports including duty status, driving time, and remaining hours of service by Web browser.

FEATURES

- Automatic near real-time updates about duty status, driving time, and remaining hours of service
- Non-driving duty status changes entered through the driver display
- Automatic near real-time notification of impending or actual violations to both drivers and dispatch
- Web-based carrier review of driver status and availability
- Driver-management and safety-audit reports
- Supports individual and team drivers
- Automatic response to requests for facsimile copies of records of duty status
- 24/7 hotline support for roadside inspection and audits

BENEFITS

- Maintain FMCSA regulatory compliance
- Reduce the risk of violations and the cost of fines
- Simplify log processes and improve reporting accuracy
- Reduce the risk of record tampering
- Reduce administrative costs
- Enable proactive fleet management
- Increase productivity and operational efficiency
- Ensure Compliance and reduce liability

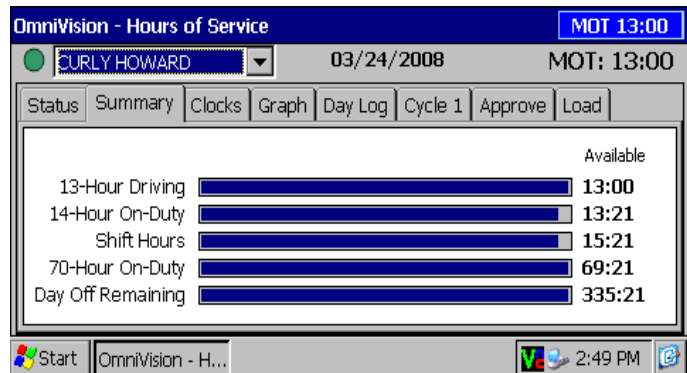

Rely Upon A Secure Solution

With HOS, drivers are prepared for roadside inspections, and inspectors can verify drivers' identities and retrieve records of duty status. Complete reports are available for viewing on demand by web browser or fax. With Shaw Tracking's redundant Network Management Centre (NMC), uninterrupted power supplies, redundant paths, backup systems and industry expertise, you can be certain of data security and technological reliability.

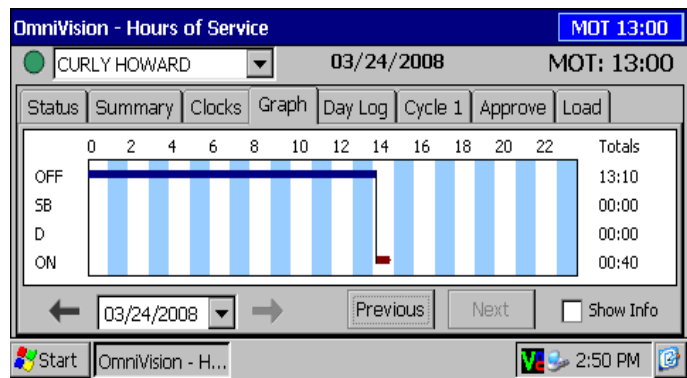

Getting More from Your Technology Investment

Shaw Tracking's Professional Services can supplement your internal resources with assessment, consulting / Process Flows, program and project management, additional training and implementation services to help you create sustainable operational efficiencies that will differentiate your business performance from your competition.

The **Shaw Tracking Services Portal** allows you to access the full suite of web-based fleet management services, including satellite mapping. The Services Portal leverages web services and XML-based standards to securely deliver data that can be integrated to your enterprise systems.
